

Relationships That Focus on the Journey, Not the Destination.

MAS 90 and MAS 200 Future Plans

MAS 90 and MAS 200 v4.05

This release will incorporate 23 distinct Extended Solutions, most of which will be particularly welcomed by customers that are using Job Cost to manage jobs or projects. The customers may be manufacturing job shops, construction-related companies or other businesses that work on a project basis. Note that these enhancements are in addition to regular maintenance and year-end changes that would normally be found in a maintenance release. Most importantly, these enhancements are being rolled into the core MAS 90 and MAS 200 v4.05 code base – giving customers the functionality as part of the upgrade itself, rather than as a separate add-on.

MAS 200 SQL v3.72

This release will incorporate the same 23 Extended Solutions being folded into v4.05, and, as with v4.05, these enhancements will be incorporated into the main code base for simplicity. MAS 200 SQL customers will also receive one additional Extended Solution – Paperless Office: Journals and Registers.

The Paperless Office Extended Solutions save businesses money by eliminating the need to store physical print, and provide a backup method of retrieving documents. Journals and registers in MAS 200 can contain dozens of pages, but usually only a subset is needed at any given time. With the Paperless Office Journals and Registers Extended Solution, customers can convert these documents to PDF format, eliminate paper waste and save money. Plus, hardcopies can still be printed out as needed. This Extended Solution will remain outside the core product and require separate installation, but will be included free of charge with the MAS 200 SQL v3.72 shipment.

Pricing Changes for Extended Solutions

Effective immediately, these Extended Solutions are being made available at 50% of their previous price – and without an additional maintenance charge. This allows customers that wish to add these Extended Solutions to their MAS 90 or MAS 200 system prior to their implementation of v4.05 can do so at reasonable cost. When v4.05 is released (and the functionality is embedded in the new release), these Extended Solutions will continue to be available for purchase for

(860) 313-0720

info@givingtreeconsulting.com

releases prior to v4.05. Customers that already own these Extended Solutions will not be charged maintenance for these enhancements on their next renewal.

Enhancement List – [Click on the enhancement for more information.](#)
